- 9:30 am USP <800> Compliance in Community Practice– Hazardous Drug Handling Practical Compliance Strategies for Independent Medical Practices**
Lou Diorio, RPh
LDT Health Solutions, Inc.

Although the potential therapeutic benefits of compounded sterile hazardous drug preparations generally outweigh the risks of their adverse effects in ill patients. The risks to healthcare workers providing these essential therapies risk similar adverse effects with no therapeutic benefit. Hazardous drugs as compounded sterile preparations (CSPs) must be handled and prepared only under conditions that protect healthcare workers. This session will attempt to describe practical strategies to reach compliance with USP General Chapters <797>, and <800>, as well as relevant OSHA, and NIOSH regulations that impact the handling of hazardous drugs by healthcare personnel.

Learning Objectives:

Management Personnel-

- Evaluate your current Hazardous Drug compounding program.
- Identify key characteristics of fully compliant HD employee training program.

Compounders / Pharmacists-

- Describe the components and work practice strategies available which can protect all compounding and administration personnel in handling HDs.
- Outline three major characteristics of a fully compliant HD compounding location / pharmacy / physical plant.
- Describe the critical characteristics of a compliant HD drug storage plan.

Nurses / Pharmacy Technicians-

- Describe the major characteristics of a comprehensive HD cleaning process.
- Describe the characteristics of a fully compliant personnel HD training program.
